

Release 6 to 7 Delta Training

This course equips you with the skills required to determine how to best leverage the functionality introduced in release 7. In an interactive environment, a Certified Varient Instructor will guide you through the navigational changes and key enhancements to Composer and provide an overview of key product enhancements. The course is delivered using a combination of lectures, demonstrations, and guided activities.

Duration: 6 hours (live web-cast delivery)

Audience: This course is recommended for anyone considering, or in the process of, upgrading from release 6 to release 7.

Pre-requisites: You are expected to be proficient in the use of Varient release 5 or 6.

Topics:

- Navigation
- Composer Overview
- Components and Connectors
- Varient Library
- Excel Add-in
- Configuring Varient Web
- Process Lists
- Presenter Enhancements
- General Enhancements
